A comparison of ESP8266 NodeMCU development boards must inevitably also compare the ESP8266 chips used on those boards. The comparison can be confusing not because there are many different boards (thereâ€™s only 3) but because there are several names for the same thing.

A very nice microcontroller, and cheap enough to use rather than the bare ESP8266 modules. It would be nice if it came with a USB mini instead of micro connector, and would also be nice to get it without the headers soldered in.
